Secondary School Certificate | 9.7

June 2019- May 2020

PROJECTS

Project 1:- AI BASED PERSONAL FINANCE ASSISTANT

- Tracks income, expenses, and spending patterns using AI to provide smart budgeting and financial insights.
- Offers personalized recommendations for saving, investing, and expense management based on user behavior.
- Automates tasks like bill reminders, expense categorization, and financial planning for better decision-making.

Project 2 : NLP BASED INTELLIGENT PAPER EVALUATION AND SCORING AUTOMATION FRAMEWORK

- Uses **Natural Language Processing (NLP)** techniques to automatically evaluate and score descriptive answers with accuracy and consistency.
- Analyzes grammar, semantics, keywords, and context to compare student responses with model answers.
- Reduces manual effort, ensures unbiased grading, and provides quick feedback for both students and educators.

TECHNICAL SKILLS

- **Languages:-**Python, JavaScript, Power BI
- **Web Technologies:-**HTML, CSS, React JS
- **Version Control System:-** Git, GitHub
- **Database:-** MySQL
